

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, SEPTEMBER 9, 2005 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4

CURRENT SITUATION:

Initial attack activity was light nationally with 114 fires reported. Four new large fires were reported, two in the Northwest Area, and one each in the Southern and Southwest Areas. Three large fires were contained, one in the Southern and two in the Eastern Great Basin Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming.

A Presidential Disaster Declaration was issued on 8/29 for Hurricane Katrina in Mississippi, Alabama and Louisiana. Two Area Command Teams are assigned (Williams-Rhodes and Ribar). Williams-Rhodes' Team is providing Incident Management Team coordination for FEMA Region IV at the Regional Response Coordination Center in Atlanta, GA for Hurricane Katrina Support. Ribar's Team is assigned to the Louisiana Emergency Operations Center in Baton Rouge, LA. The Team is coordinating activities of the Incident Management Teams in FEMA Region VI. Numerous resources are being mobilized as part of the relief effort.

SOUTHERN AREA INCIDENTS / LARGE FIRES:

HURRICANE KATRINA SUPPORT, Federal Emergency Management Agency. Emergency Support Function #4 is staffed at the Regional Response Coordination Centers in Atlanta, GA and Denton, TX. Seven Type 1 Incident Management Teams (Custer, Quesinberry, Pincha-Tulley, Gelobter, Cable, Molumby and Wilcock) are assigned. Custer's Team is managing an evacuation center and base camp, providing services to military, state, local and federal agencies at Louis Armstrong New Orleans International Airport in Kenner, LA. Quesinberry's Team is managing receiving and distribution operations for FEMA at the Meridian Naval Air Station in MS. Pincha-Tulley's Team is managing several camps and supporting the receiving and distribution of relief supplies at Stennis Space Center in MS. The Team also assisted in establishing an incident command post for FEMA. Gelobter's Team is managing a base camp at Gautier, MS. Cable's Team is managing a base camp and providing support to out of state and foreign firefighters and search and rescue personnel at Baton Rouge, LA. Molumby's Team is engaged in constructing and managing a base camp in support of the Disaster Mortuary Operation Response Team at St. Gabriel, LA. Wilcock's Team is in Selma, AL, establishing an ICP in preparation for managing FEMA mobile trailer staging areas.

Eight Type 2 Incident Management Teams (Mullenix, Smith, Thomas, Philbin, Stanford, Hildreth, Whalen and Sinclear) are assigned. Mullenix's Team is managing four relief centers to date at San Antonio, TX. The Mexican Army is providing food service at the ICP. More than 12,000 evacuees to date have passed through the centers. Smith's Team is managing a base camp at Camp Shelby, MS. Thomas' Team is managing a base camp and supporting military and civilian operations at the National Construction Battalion Center at Gulfport, MS. Philbin's Team is being assigned to a new evacuee center in Phoenix, AZ. Stanford's Texas State Incident Management Team is managing a base camp at Hammond and Reserve, LA. Hildreth's North Carolina State Incident Management Team is managing a mobile base camp and staging area in Mobile, AL. Two Type 2 Incident Management Teams (Whalen and Sinclear) are in Jackson, MS to clear

roadways and support National Forest recovery operations in Mississippi. A Planning Team (Terry) is supporting relief efforts at the Long Term Recovery Center in Orlando, FL.

Five Logistics Management Teams (Prevey, Humphrey, Lineback, Jenkins and Floyd) have been mobilized; two to Meridian, MS, and one each to Camp Beauregard, LA, Maxwell Air Force Base, AL, and Barksdale Air Force Base, LA. A Florida State Incident Management Team (Jones) has established a Logistical Staging Area at Stennis Space Center in MS. A Florida State All Risk Incident Management Team (Hill) has been assigned at Biloxi, MS. The Team is providing logistical support to Urban Search and Rescue teams. National Park Service All Risk Teams have been assigned to various areas to assist with hurricane recovery. A U.S. Fish and Wildlife Service team is engaged in road clearing, community assistance, and supporting search and rescue work in LaCombe, LA.

OKS – Oklahoma Division of Forestry

EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

VALLEY ROAD, Sawtooth National Forest. A Type 1 Incident Management Team (Sexton) is assigned. This fire started on private land 15 miles south of Stanley, ID in timber. Residences, commercial property, a work center, wildlife habitat, campgrounds and recreation areas remain threatened. Area closure and evacuations remain in effect for residents and campers. Structure protection remains in place. Plume dominated fire behavior with running, crowning and long-range spotting was observed.

FORT HALL COMPLEX, Fort Hall Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Suwyn) is assigned. This complex, comprised of the Rattlesnake and Sawmill fires, is 16 miles south and east of Pocatello, ID in grass, brush and timber. Steep, inaccessible terrain continues to hamper containment efforts. Minimal growth was reported.

FRANK CHURCH, Payette National Forest. A Fire Use Management Team (Reinarz) is assigned. This lightning caused Wildland Fire Use (WFU) incident, comprised of the Bear Creek, Root Creek, West Fork/Joe, Missouri Ridge and several other fires is 50 miles northeast of McCall, ID in timber. The fire is being managed to accomplish resource objectives. Historic structures, mines and cabins remain potentially threatened. Structure protection remains in place. Remote location and difficult access are impeding operations. Surface fire and isolated torching were observed.

BIG DRY CANYON COMPLEX, Caribou-Targhee National Forest. A Fire Use Management Team (Cones) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Big Dry Canyon, Powder and Powder Peak fires, is 10 miles east of Swan Valley, ID. This complex is being managed to accomplish resource objectives. One cabin is threatened. Structure protection is in place. Backing fire with isolated torching was reported.

SCF – Salmon-Challis National Forest

NORTHERN ROCKIES AREA INCIDENTS / LARGE FIRES:

HARPERS BEND, Craig Mountain Area Office, Idaho Department of Lands. This fire is two miles northwest of Peck, ID in timber. Residences and other structures remain threatened. Steep terrain and limited access continue to hamper containment efforts. Surface fire and spotting were observed.

SIGNAL ROCK, Bitterroot National Forest. A transfer of command from a Type 2 Incident Management Team (Turman) to a Type 2 Incident Management Team (Carlson) will occur today. The fire is 17 miles southwest of Philipsburg, MT in timber and is burning on both the Bitterroot and Beaverhead/Deerlodge National Forests. Active fire behavior with crown runs was reported.

SELWAY-SALMON COMPLEX, Bitterroot National Forest. A Fire Use Management Team (Cook) is assigned. This lightning caused Wildland Fire Use (WFU) complex, comprised of the El Capitan, Wapiti, Beaverjack, Reynolds and numerous other fires, is 26 miles southwest of Hamilton, MT in timber. This complex, burning on both the Salmon-Challis and Bitterroot National Forests, is being managed to accomplish resource objectives. Historic structures, a work center and a lookout remain threatened. Structure protection remains in place and trail closures are in effect. Active fire behavior with torching was reported.

LONG BLACK COMPLEX, Clearwater National Forest. This complex, comprised of the Long Creek and Black Canyon fires, is 38 miles northeast of Pierce, ID in timber. Residences, a commercial property and other structures are threatened. Steep terrain and limited access continue to hamper containment efforts. Creeping and isolated torching were reported.

SEEPAY #2, Flathead Agency, Bureau of Indian Affairs. This fire is two miles southwest of Perma, MT in timber. No new information was reported.

ROCKIN, Bitterroot National Forest. This fire is 10 miles northwest of Darby, MT in timber. No new information was reported.

POWELL WFU COMPLEX, Clearwater National Forest. This lightning-caused Wildland Fire Use (WFU) incident is located 45 miles southwest of Missoula, MT in grass, brush and timber. This fire is being managed to accomplish resource objectives. No new information was reported.

RED RIVER COMPLEX, Nez Perce National Forest. This lightning-caused Wildland Fire Use (WFU) incident is located 23 miles southeast of Elk City, ID in litter and timber. This fire is being managed to accomplish resource objectives. No new information was reported.

NORTHWEST AREA INCIDENTS / LARGE FIRES:

SQUAW CREEK, Northeast Region, Department of Natural Resources. A Washington Interagency Incident Management Team (Reed/Holloway) has been ordered. This fire is located 3 miles southwest of Methow, WA in timber. Residences and other structures are threatened. Running, spotting and torching were observed.

PINE STUB, Prineville District, Bureau of Land Management. This fire is eight miles east of Post, OR in grass, sage brush, juniper and timber. Active fire behavior with running, spotting and torching was reported.

GRANITE COMPLEX, Wallowa-Whitman National Forest. A Type 2 Incident Management Team (Lunde) is assigned. This lightning caused Wildland Fire Use (WFU) incident is 30 miles east of Enterprise, OR in timber and grass. This complex is being managed to accomplish resource objectives. Creeping, smoldering, and isolated torching were observed.

OUTLOOK:

Red Flag Warning: For southeast and south central Idaho for strong winds and low relative humidity. For most of southern and southeastern Montana for gusty winds, high temperatures and low relative humidity. For parts of eastern, central and southern Nevada due to gusty winds and low relative humidity.

Fire Weather Watch: For northeast Wyoming for strong winds and low relative humidity.

Weather Discussion: The upper low which was off the California coast on Thursday will be moving across the Great Basin today. Also, a strong low pressure trough will be sweeping into the Pacific Northwest with cooler temperatures and showers. The combination of these two systems will also bring strong winds and thunderstorms to portions of the intermountain West. Along the Gulf Coast, it will be partly cloudy with highs in the lower 90s.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Eastern Great Basin Idaho, Bridger-Teton: Partly cloudy, windy, turning colder. Isolated showers and thunderstorms. Northern Utah: Partly cloudy and windy with scattered thunderstorms, mainly mountains. Southern Utah, Arizona Strip: Partly cloudy and windy with scattered showers and thunderstorms.	Idaho, Bridger-Teton: 66 to 75 mountains, 75 to 88 valleys. Northern Utah: 67 to 78 mountains, 78 to 91 valleys. Southern Utah, Arizona Strip: 66 to 80 mountains, 80 to 95 valleys, 98 to 102 Lake Mead area.	Idaho, Bridger-Teton: 25 to 40% mountains, 10 to 25% valleys. Northern Utah: 22 to 30% mountains, 15 to 20% valleys. Southern Utah, Arizona Strip: 25 to 40% mountains, 15 to 25% valleys.	Idaho, Bridger-Teton: South to southwest 15 to 30 mph, shifting to north 10 to 20 mph mountains late. Northern Utah: South to southwest 20 to 30 mph. Southern Utah, AZ Strip: South to southwest 20 to 35 mph.
Northern Rockies West of Divide: Turning much cooler northwest with widespread moisture beginning late tonight. Gusty winds. East of Divide: Hot and windy with	West of divide: 70s. East of divide: 74 to 94. North Dakota: 87 to 92.	West of divide: 25 to 35%. East of divide: 12 to 25%. North Dakota: 20 to	West of divide: West 15 to 30 mph. East of divide: Southwest to Northwest 15 to 30 mph. North Dakota: Southeast

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
low RH.		40%.	15 to 25 mph. Stronger gusts all areas.
Northern California Showers and isolated thunderstorms ending from west to east in the morning, except a slight chance of afternoon thunderstorms along and east of the Cascade-Sierra crest.	50s and 60s coast, 60s and 70s higher elevations, and 80s warmest inland valleys.	20 to 40% inland valleys, slightly lower east of the Cascade-Sierra crest.	Increasing in the afternoon to west-northwest 10 to 18 mph with gusts to 35 mph along and east of the Cascade-Sierra crest. Southwest to northwest 6 to 12 mph with gusts to 25 mph elsewhere.
Southern California Morning low clouds and fog into the coastal valleys, otherwise mostly sunny, except partly cloudy with isolated afternoon showers and thunderstorms over the Sierra and southeast desert.	65 to 80 mountains. 78 to 88 valleys. 80 to 90 upper deserts. 90 to 102 lower deserts.	10 to 20%.	Southwest to northwest 10 to 20 mph.
Western Great Basin Partly cloudy skies. Isolated afternoon and evening showers and thunderstorms across northwestern Nevada.	North valleys: 72 to 87. South valleys: 80 to 101. Mountains: 54 to 80.	North valleys: 12 to 24%. South valleys: 10 to 16%. Mountains: 16 to 30%.	Southwest to west at 10 to 20 mph with gusts to 30 to 35 mph.
Rocky Mountain Partly cloudy with isolated thunderstorms, a few dry.	80s (65 to 75 mountains).	RH from 10% to 18% at lower elevations of central/northeast Wyoming.	South to southwest 15 to 35 Wyoming, South Dakota, and northern Colorado, 10 to 20 mph.

SAFETY ZONES

A safety zone is a location where the threatened firefighter can find adequate refuge from an approaching fire.

- What is the difference between a safety zone and a deployment site?
 - The safety zone is the area where a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.

- How do you identify a good safety zone?
 - Consider the distance from the escaped fire as well as topography, winds, fire behavior, and fuels in the area.
 - The best locations are usually “in the black;” those with a minimum of, or devoid of, ground/aerial vegetation; or large bodies of water.
 - Size is sufficient for all present resources with a minimum distance from fire of at least four times the maximum flame length.
 - Location is scouted and marked well for visibility at all times.
 - Location has been reassessed in relation to line work progress, fatigue, changes in fire behavior, and arrival of additional resources.
